DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group II, claims 14-17 and 23-25 in the reply filed on 09/07/2004 is acknowledged.

Information Disclosure Statement

2. The IDS filed 10/25/2002 has been considered and recorded in the file.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 14-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Jokinen et al. (US 2002/0095333).

Art Unit: 2682

Regarding claim 14, Jokinen teaches a method comprising: maintaining in a wireless device a list of real-world services that are available from a user of the device through an application running on the device, see [0038], [0040], and [0047]; and through a wireless communication channel, broadcasting information from the device indicative of the available real-world services, see [0040], 0054].

Regarding claim 15, Jokinen also teaches that the information is broadcast periodically, see [0048].

Regarding claim 16, Jokinen also teaches that another wireless device that receives the broadcast information accesses one of the available real-world services, see figure 10 and [0055].

Regarding claim 17, the apparatus claim is interpreted and rejected for the same reason as set forth in the method claim 14.

5. Claims 23-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Irvin (US 6,658,264).

Art Unit: 2682

Regarding claim 23, Irvin teaches a method comprising: maintaining a list of short-range wireless devices within range of a first short-range wireless device (col. 8, 59-64); transmitting a message from an identified user of the first device to a second identified user of a second wireless device over a communication medium (col. 8, 64-66), the communication medium being selected based at least in part on whether the second device is included on the list, the selection being transparent to the user of the first device (col. 8, 66 through col. 9, 4).

Regarding claim 24, Irvin also teaches that if the second device is included on the list, the message is transmitted to the second device over a short-range radio link, and if the second device is not included on the list, the message is transmitted to the second device using another communication medium (col. 8, 64 through col. 9, 4).

Regarding claim 25, Irvin also teaches that if the second device is not included on the list, the message is transmitted to the second device

Art Unit: 2682

over either the Internet or by mobile telephony (col. 8, 64 through col. 9, 4).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LEE NGUYEN whose telephone number is (703)-308-5249. The examiner can normally be reached on 8:00 AM - 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, VIVIAN CHIN can be reached on (703) 308-6739. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
